

The website includes a searchable database that allows you and your class to explore the Maya codices in more detail. After you return to the home page, click on the link to “Search the database.” You will see a box where you can type in different words or concepts that you are interested in exploring further.

Some searches that you might want to try include:

- Chaak [or Itzamna or Kimil]
- maize [corn]
- cacao
- deer
- bee
- owl [or quetzal or macaw]
- weaving
- planting [or agriculture]
